Professional Summary

AI Engineer specializing in Generative AI, Agentic Workflows, LLMs, and RAG architectures. Experienced in building multi-agent systems using LangGraph and CrewAI, fine-tuning transformer models (FLAN-T5), and deploying high-performance vector search pipelines with Qdrant and FastAPI. Placed 4th in the global BEA 2019 GEC Shared Task.

Technical Skills

Languages & Databases: Python, JavaScript (ES6+), SQL, MongoDB, Qdrant (Vector Database)
Generative AI & Agentic AI: LLMs, RAG Architecture, Agentic AI, LangChain, LangGraph, LlamaIndex, CrewAI, Claude AI, Prompt Engineering
AI, ML & Deep Learning: Machine Learning, Deep Learning, Neural Networks, Natural Language Processing (NLP), TensorFlow, Keras, OpenCV, MediaPipe, Hugging Face, FLAN-T5
Full-Stack Development: React.js, Node.js, Express.js, RESTful APIs, JWT Authentication, HTML5, CSS3

Professional Experience

Next Education India Private Limited — June 2026 – Present
AI Engineer Intern — *Hyderabad, India*

- Researched, benchmarked, and evaluated open-source GEC models and datasets, performing licensing analysis, data preprocessing, and comparative feasibility studies for domain adaptation.
- Selected and fine-tuned FLAN-T5-Large for GEC, optimizing target-generation accuracy and tailoring the model to complex grammatical correction tasks.
- Architected and deployed a RAG pipeline utilizing Qdrant Vector Database, automated API authentication, vector collections, and synthetic CSV data ingestion in Python.
- Submitted the fine-tuned model to the BEA 2019 GEC Shared Task, securing 4th place among participating international systems.

Key Projects

GrammarGuard AI – Agentic Grammar Error Correction System | *Python, LangGraph, LLMs, Qdrant, FastAPI*

- Developed an agentic GEC platform using Python, LangGraph, LLMs, and NLP to identify, correct, and explain grammatical errors in academic and professional writing.
- Implemented an autonomous multi-stage workflow with context-aware correction, verification, conditional routing, and deterministic retry mechanisms.
- Integrated Qdrant vector retrieval for instant grammar rule matching and few-shot examples, establishing a pipeline for benchmark-driven evaluation and fine-tuning.
- Built a dynamic React.js frontend and an asynchronous FastAPI backend for real-time error telemetry and interactive writing feedback.

AgentFlow AI – Autonomous Multi-Agent Business Intelligence System | *CrewAI, LangGraph, LLMs, Qdrant, LangChain*

- Engineered a multi-agent system leveraging Python, CrewAI, LangGraph, and LLMs to autonomously plan and execute complex business analysis workflows.
- Implemented an enterprise RAG pipeline using Qdrant and LangChain to retrieve context-specific insights from unstructured business documents with source attributions.
- Designed resilient execution graphs featuring conditional routing, custom tool execution, reviewer feedback loops, and human-in-the-loop approval checkpoints.
- Integrated data analytics utilities and an interactive React.js dashboard to trace agent execution live and generate structured, actionable reports.

Education

GLA University — Aug 2022 – June 2026
Bachelor of Technology (B.Tech) in Computer Science – ***CGPA: 7.8/10.0*** — *Uttar Pradesh, India*
Kanha Makhan Public School — Apr 2020 – May 2021
CBSE Class 12 (Senior Secondary) – ***Score: 83.6%*** — *Uttar Pradesh, India*

Certifications & Achievements

- **4th Position – BEA 2019 GEC Competition:** Participated in the BEA 2019 GEC Shared Task, submitting a fine-tuned model and securing 4th position globally.
- **1st Position – IBM ICE Day Event:** Secured 1st place in a Technical Paper Presentation focused on innovative software solutions and emerging technologies.
- **Top Performer – NPTEL Certification:** Achieved 1st Position / Top Performer in Organizational Behaviour: Individual Dynamics in Organization, conducted by IIT Guwahati.
